

# VERIFIED COMPONENT LIST AAMA CERTIFICATION PROGRAM

March 1, 2019

This list is comprised of those manufacturers of window and door components for whom Associated Laboratories, Inc. (ALI; AAMA's independent validator) has on file a current test report from an AAMA Accredited Laboratory or Approved Component Laboratory indicating that the samples submitted for test are in full compliance with the applicable specification. Testing shall be conducted by an AAMA-accredited independent full-service laboratory or approved Component Lab which is approved for the specification(s) for which the component is listed. AAMA does not certify individual components. Company names in **Bold Face Type** are AAMA **Category 1** members.

**Part One – Components of Certified Windows and Doors:** This list is presented as a service to indicate component test reports on file with the validator for use in window and door certification. If a supplier's product(s) is not included in Part One, the product(s) may not be used in a window or sliding glass door labeled in the AAMA Certification Program until ALI receives a current test report from an AAMA Accredited Laboratory or Approved Component Laboratory.

**Part Two – Materials and Components Used for Installation:** These manufacturers have voluntarily had their products tested, validated, and listed as meeting the requirements of the AAMA specification or standard as indicated.

## Part One Components of Certified Windows and Doors

### PAINT APPLICATORS

Listings in this section indicate that the Applicator has applied and tested a coating in compliance with the appropriate AAMA specification. Test reports are valid for 36 months from the test report's completion date, indicated on this report by brackets [ ]. AAMA verifies that these application lines have on file tests indicating the ability to correctly apply coatings required in the AAMA Certification Program. (Only those applicators indicated by an asterisk (\*) have completed outdoor exposure testing.) At this time, specific paint coatings are not included as part of the AAMA Verified Components Program. In order for an applicator to be listed in the AAMA Verified Components Program, they must be coating commercially available fenestration or building products.
