

# VERIFIED COMPONENT LIST AAMA VERIFIED COMPONENTS PROGRAM

May 1, 2025

This list is comprised of those manufacturers, distributors, and dealers of fenestration components for whom Associated Laboratories, Inc. (ALI; FGIA's independent validator) has on file a current test report from an AAMA Accredited Laboratory indicating that the samples submitted for test are in compliance with the applicable specification. Testing is conducted by an AAMA-accredited laboratory which is approved for the specification(s) for which the component is listed. FGIA does not certify individual components. The component is listed under the licensed location submitting the required test data and may not reflect the manufacturing location of the product. Specific questions regarding the origination of the component should be directed to the listed licensee.

Company names in **Bold Face Type** are FGIA **Category 1** members.

Test reports are valid for 36 months from the test report's completion date, indicated on this report by brackets [ ].

**Part One – Components of Certified Windows and Doors:** This list is presented as a service to indicate component test reports on file with the validator for use in window and door certification. If a supplier's product(s) is not included in Part One, the product(s) may not be used in a window or sliding glass door labeled in the AAMA Certification Program until ALI receives a current test report from an AAMA Accredited Laboratory.

**Part Two – Materials and Components Used for Installation:** These manufacturers have voluntarily had their products tested, validated, and listed as meeting the requirements of the AAMA specification or standard as indicated.

## Part One Components of Certified Windows and Doors

### PAINT APPLICATORS

Listings in this section indicate that the Applicator has applied and tested a coating in compliance with the appropriate AAMA specification. FGIA verifies that these application lines have on file tests indicating the ability to correctly apply coatings required in the AAMA Certification Program. (Only those applicators indicated by an asterisk (\*) have completed outdoor exposure testing.) At this time, specific finishes are not included as part of the AAMA Verified Components Program. For an applicator to be listed in the AAMA Verified Components Program, they must be applying finishes to commercially available fenestration or building products.
